Public Comment:

Clayton Rounds said he has lived in Bennett's Addition for over 30 years, he has experienced flooding here five times and has dug a ditch around his property with a 20" culvert but his place flooded anyway with the recent rain/snow melt off. He thinks the culvert under Onaway Road is too small at 18". Water is coming from Onaway and the farm field next to Bennett's Addition.

Larry Chambers, also from Bennett's Addition stated the water goes across the street and floods out the folks across the street from him. The rain and melt off water was like a river he

was pumping 60-80g/min and could not keep up with the flow and also experienced flooding. He agrees that the culvert at Onaway Road is not big enough to handle water flow like this and thinks the culvert needs to be 3'-4'.

The residents from Bennett's Addition would like the Council, Mayor and City Engineer to come out and look at the culvert and the drainage issue and see if there is something the city can do to keep flooding from happening in the future.

Matt Taylor would like to pray for the council and asked for Harmony to give his email to all council members so they could send prayer requests to him.
